

ELE1EDP 2007

JLAB

STARTING INSTRUCTIONS

Aim

This laboratory is to acquaint you with the Java boards and software, in preparation for the project which begins next week.

1 Getting Started

When the laboratory first starts, click in succession:

START -> Programs -> Java Programming -> getting started.pdf

This will open the manual which will guide you through the initial setup process, and then introduce you to the JLAB board and software.

2 Software Transfer

You must copy the *template directory* named **java** from from the network drive location

I:_Subject Data Files\ELE12EDP\JAVA - student resources

into your **H:** drive's root folder, i.e. into **H:**

Within this directory is a *link* to the (write protected) **builder** program, so that you won't need to download new copies of the builder utility in the event of an update.
