

# MAT1DM Digital Logic Labs Materials Online

All MAT1DM Digital Logic laboratory documents, including lab notes and mark sheets are available at this web site:

<http://www.ee.latrobe.edu.au/~gt/mat1dm/>

You are **expected** to download and **print** the lab notes in advance of each session, and then **bring** them with you.

(The lab coordinator, Geoffrey Tobin, will **NOT**, repeat **NOT**, print copies of labs 2, 3 and 4 for everyone.)

It is *highly recommended* that you read the lab notes and attempt all **calculations** and **designs** at least a day before your session.

(*Advance preparation* will *greatly* assist you in finishing the lab on time.)

If you own a pair of *pliers* and a pair of *side-cutters* suitable for single-strand (“hook-up”) wire, you will find them *valuable* in MAT1DM Digital Logic labs.
